

Technology Notes

- A login is required to use the computers (ECS will provide this to the presenters)
- *Presenters are strongly encouraged to put their presentations on a flash drive that is PC compatible*
- Classroom computers have access to DropBox and OneDrive (if needed to retrieve personal files)
- Please do not remove any dongles/receivers already plugged into computers
- Both the computers and touchpad are ADA compliant
- The system was designed to work with PC's, there may be some compatibility issues if a MacBook is connected to the system (for example: trying to play a movie purchased through iTunes)
- For PPT's (in the MVR specifically), presenters cannot see the "presenter mode" on the confidence screen. We recommend presenters bring their own notes.
- Lapel microphones can be turned on by holding the MUTE button at the top (if no sound is coming out, adjust the decibel switch until the sound comes on)
- Make sure the wireless mouse is turned ON (button under the mouse)
- Wireless keyboards are solar powered and should not be stored away (please keep them on top of the podium)
- The MVR computer podium can be moved to the back of the room (please let ECS know in advanced if you would like it moved).
